Good Morning,

I am reaching out to get comment about the LCSC making its X/Twitter account private. This appears to be a violation of Indiana's public records laws, along with some obvious 1st amendment violations.

There has already been a case with an opinion from the Public Access Counselor regarding this kind of thing. I have attached it for you to review.

I have also reached out to the PAC myself who seems to agree with my assessment.

If the school district is set on "following the law" when it comes to allowing a biological boy in the same dressing/restroom facilities as girls, why is the district not following the law when it comes to public access to records?

Thank you,  
Clifton French
